Master of Research

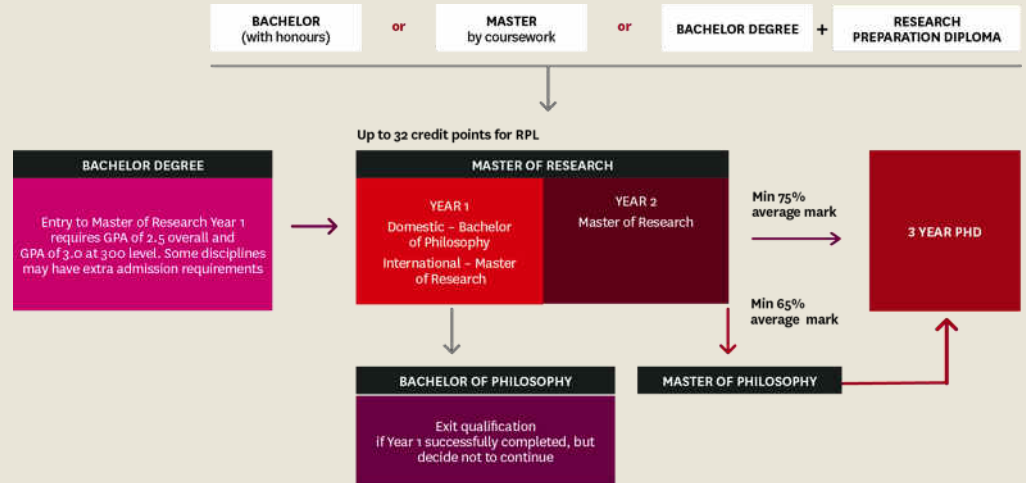

“THE MACQUARIE MODEL”

The Master of Research is the entry pathway to a PhD at Macquarie University

Why did we stop the traditional honours programs and develop the Master of Research?

International portability – Bologna process

- Inadequate research prep (long completion times)
- Insufficient disciplinary knowledge for research
- Create cohort: building learning communities
- Masters more attractive to students than Honours

PhD Program

3 Years of research on a specific research project

Pure research PhD – no coursework but some programs may have Research Training Units

Learning Skills/Development Workshops are available

Before applying, the candidate should have a research proposal and contact a suitable supervisor

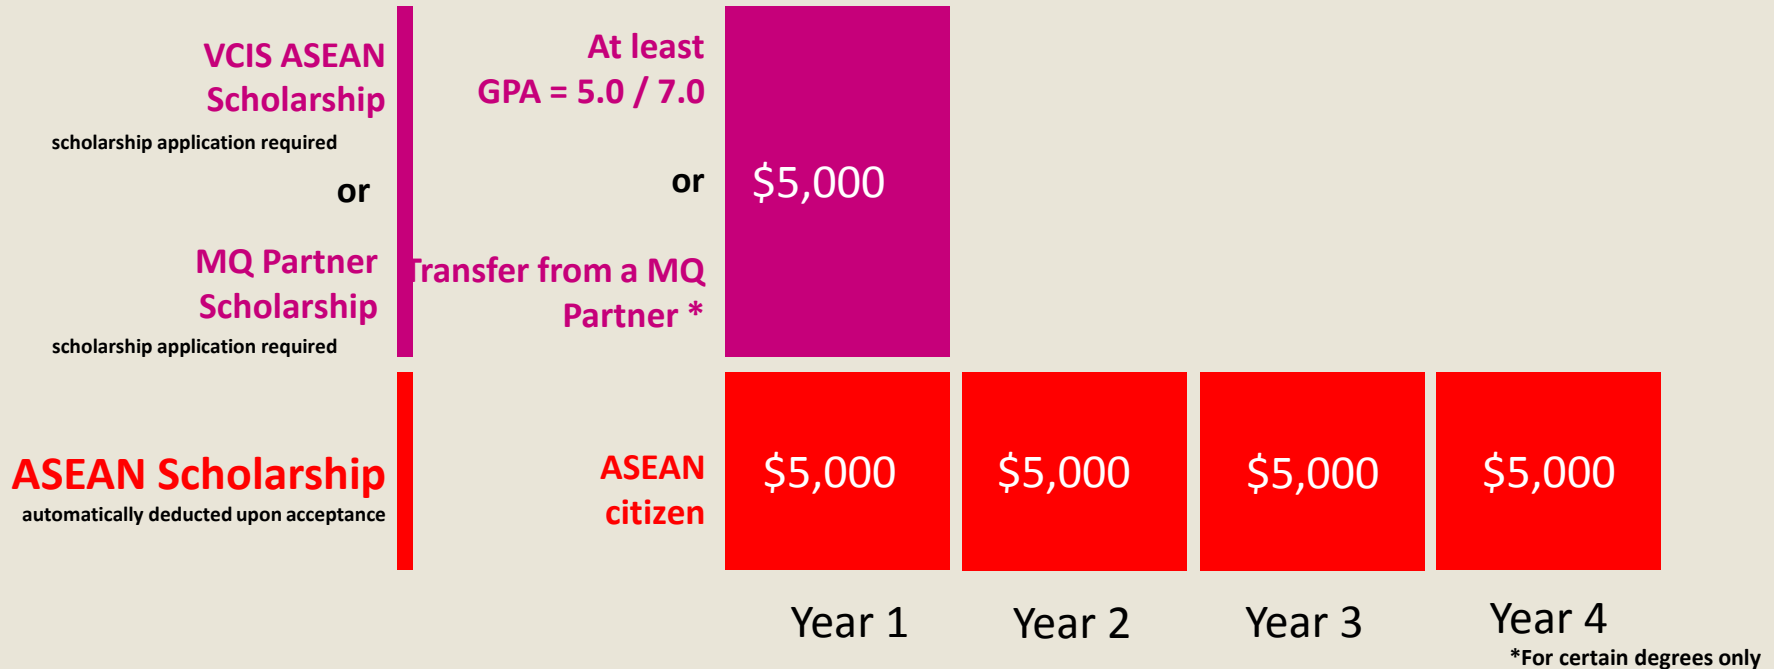

Supervisors can be found on the Macquarie University Supervisor Register <https://mqsr.mq.edu.au/MQSR/>

Applications are completed online
