“

I would like to thank the teachers at the International Study Centre for supporting me at the start of my foundation year. I was struggling a little bit with the research skills, as it was my biggest weakness for me at that time, but then I progressed further with their help and support. And without them I couldn't be where I am today.

“

I've learned so much about team working and communication. Everyday you need to communicate to other people and get your message heard by other people, at the same time whilst hearing them. I think most of these skills I've actually improved, and my acumen and my knowledge and experience has just increased.
