

2016 Postgraduate course guide

*Shaping the
direction
of business*

“Our progressive education programs shape students into highly proficient people who can make a positive contribution to their workplace, and have the skills and knowledge to address contemporary business challenges and find positive and effective solutions.”

Professor Colm Kearney
Head of School

Welcome to Monash Business School

“Our goal is to create graduates and business leaders who look beyond their discipline to understand the world’s problems and to find innovative solutions.”

Professor Colm Kearney
Head of School

Monash Business School is a progressive academy delivering the highest quality teaching, learning, scholarship and research.

As one of the world’s leading research-intensive business schools, our ambition is to transform business by advancing knowledge and addressing global challenges. We do this by educating the world’s future business and societal leaders and by contributing to the development, growth and transformation of local, national and international economies through our research.

We’re part of Monash University, Australia’s largest and most diverse university, and our brilliant students and researchers lead the way in tackling the world’s greatest business challenges.

We leverage Monash University’s international campuses and alliances to expand our international collaborations and engage with industry through strategic alliances and networks, to provide an advanced postgraduate business curriculum that produces distinctive, responsible and sought-after graduates.

Monash Business School are leaders in contemporary business education, and are among the 1% of business schools in the world to have achieved the elite ‘triple crown’ of accreditation by the three major global business school accreditation bodies – AACSB, EQUIS and AMBA – and the only Group of Eight business school to have done so.

Our expertise spans all the major business and economics disciplines, and our 500-strong team of academics is among the best in the world. Their calibre, enthusiasm and dedication provides an exceptional learning environment that will lead to success.

We equip our students with a passion for their discipline but also with the experience and confidence to operate in a global environment. We teach you to work independently and to develop critical and analytical thinking, skills crucial for future leaders. Our goal is to create graduates and business leaders who look beyond their discipline to understand the world’s problems and to find innovative solutions.

We are dedicated to creating future business leaders with passion and vision.

Monash is in the top 150 world universities according to the Academic Ranking of World Universities compiled by Shanghai Jiao Tong University.

“Monash Business School educates future business leaders. To do so, we are at the forefront of contemporary business. We engage and collaborate with the business community to ensure that our graduates are highly regarded – they possess the professional and personal skills to make positive contributions to existing and future business challenges.”

Professor Keryn Chalmers
Deputy Dean (External and International)

Creating business professionals with contemporary skills

Graduating with a degree from a business school among the world's top one per cent adds significant value to your resume.

A graduate degree in business is a valuable investment in your future and will turn your career goals into actions. Many people use their degree as a springboard for landing a more senior job in their industry, while others take the skills and knowledge they have accumulated to change career direction or launch their own enterprises.

Top CEOs prefer Monash Business School graduates

Monash Business School has an enviable reputation for teaching and research excellence across business disciplines. We deliver academic excellence with an emphasis on experiential learning, adding real-world value to our students and the communities they serve.

We recognise that business is constantly evolving. That's why we equip you with the skills and knowledge you need to prepare for, and embrace, the challenges that you will face in business, both now and in the future.

Graduating with a degree from one of the world's top one per cent of business schools adds significant value to your resume. Our global reputation ensures you are recognised for your skills and talent – no matter where in the world you choose to pursue your dreams.

Unlike many other business schools around the world, Monash Business School a leading research-intensive business school.

Our greatest strength is the ability to apply high-level technical expertise and theories to 'real-world' industry contexts and scenarios and to make a real difference to communities.

This translates directly into our teaching programs so that all our disciplines lead the way in business education and all our programs are underpinned by the latest research knowledge.

A globally-recognised qualification

Monash Business School is accredited by leading business school accreditation bodies across the world.

These accreditations show that we stand confidently among the best of the best, and that our trajectory is continuing to rise. Organisations across the globe will recognise these achievements – and your qualification – as meeting true standards of quality.

A reputation for excellence

Ranked No.1 in the Asia-Pacific region for Econometrics, Cognitive and Behavioural Economics and Development Economics
Research Papers in Economics (RePEC)

Hold a five-star rating in Economics, Econometrics, Accounting and Auditing and Accountability
Excellence in Research for Australia (ERA) 2012

Connecting *education and industry*

We have developed extensive links with business faculties, corporate organisations and government bodies around the world.

Monash Business School is closely aligned with, and has strong links to industry, both in Australia and overseas, to ensure our programs meet the needs of both students and employers.

Professional recognition

Many of our programs are recognised by professional bodies and associations, and enable you to satisfy educational requirements for professional registration or membership. These bodies include:

- Association of Chartered Certified Accountants
- Australian Human Resources Institute (AHRI)
- Australian Institute of Management (AIM)
- Chartered Accountants Australia and New Zealand
- Chartered Financial Analyst Institute
- Chartered Institute of Management Accountants
- CPA Australia
- Financial Services Institute of Australasia (FINSIA)
- Institute of Actuaries of Australia
- Institute of Public Accountants
- Tax Practitioners Board

Business relationships

We have developed extensive links with business faculties, corporate organisations and government bodies around the world, offering a wide range of opportunities to broaden your educational experience.

These partnerships include research collaborations, research and consulting services, student exchange programs, engagement with business, corporate and government organisations, and internship and corporate project programs.

International memberships

In addition to its international accreditations Monash Business School is a member of or signatory to:

- Association of Asia Pacific Business Schools (AAPBS)
- Academy of Business in Society (ABIS)
- Globally Responsible Leadership Initiative Accreditation (GRLI)
- Quantitative Techniques for Economics and Management
- Principles for Responsible Management (PRME)

A world-leader in higher education

Monash is ranked in the top one per cent of world universities by the Times Higher Education World University Rankings 2014/2015

Monash is ranked among the top 100 universities for business and economics by the Academic Ranking of World Universities compiled by Shanghai Jiao Tong University.

"As part of the postgraduate curriculum students are exposed to guest lecturers from industry and other areas of academia. This gives us a really good overview of different areas of business and the role of each in industry."

"My postgraduate studies have taught me to think outside the box and look at new ways of doing business. I've learned how to approach business issues in a way that is more sustainable, efficient and economically savvy."

Fiona Lewis
Master of Business (Science and Technology) alumnus

Why choose Monash Business School?

Many of our master's programs give you the ability to tailor your studies to your personal interests and career goals through our extensive elective units.

With a mix of coursework and research-based programs designed to develop your theoretical knowledge and practical skills, our postgraduate degrees are designed for people who are looking to develop new skills and those who are looking to develop additional expertise in their current field.

We also offer a range of courses for people who are interested in developing management skills, want to move into senior roles, or progress to further study. In addition to this, we also offer:

A flexible approach to learning

You can study full time or part time, and, if you need to adjust your goals you can. For example, you might start a master's course, but choose to exit early with a Graduate Diploma in Business. Or you can start with the graduate diploma and decide to continue onto a master's program.

On and off campus learning options

Many of our coursework programs are available both on and off campus, with some delivered in a 'blended mode' that involves a mix of on campus and off campus or online learning. Some of our units are also offered in 'intensive block mode' – which lets you organise a short

break from work to complete a unit. And you don't have to commit to one specific mode of learning. You can, for example, take one off-campus unit and one on campus (where available). Our goal is to make your postgraduate study work with your existing commitments.

Courses tailored to your needs

Many of our master's programs give you the ability to tailor your studies to your personal interests and career goals through our extensive elective units. Most courses offer the ability to study elective units from across your discipline area, and many also give you the opportunity to choose your electives from units offered by other faculties of the university. We also offer research pathways in many of our master's courses, giving you the opportunity to explore research opportunities before commencing a PhD.

Our programs

Graduate certificates and diplomas

These shorter programs enable you to extend your knowledge in general business principles. Their flexible structure means you can study broad business units, or take a sequence of units in a specific discipline. Successful completion of these programs may also lead to admission into our master's programs.

Master's by coursework

Our extensive master's programs enable you to grow your expertise in a specific area of business, and significantly propel your career and earning power. We offer an extensive list of master's programs for both early career professionals and experienced professionals across the full spectrum of business disciplines.

Double master's degrees

For students who wish to develop skills in a multitude of disciplines, we offer two unique double master's degree programs. These programs allow you to graduate with qualifications in two diverse areas of business in a similar timeframe to a traditional two-year master's program.

Monash MBA and Monash Executive MBA

Our top-ranking MBA programs are designed to help you take your already successful career to the next level. For more information on our MBA programs please refer to page 78 or go to mba.monash.edu

Research degrees

Our Master of Philosophy and Doctor of Philosophy programs are designed to provide the background and skills necessary to conduct independent research and prepare you for an academic career in teaching and research.

"A postgraduate business qualification is an important component of your career journey. The portfolio of Monash Business School postgraduate offerings provide a range of options to enhance your technical knowledge, develop your problem solving skills and network with a cohort of people at a similar stage of your career journey.

Our options include courses designed for students straight out of undergraduate study to courses designed for mature professionals with significant work and management experience."

Professor Robert Brooks
Deputy Dean (Education)

Course details

Course code: 1679
CRICOS code: 069580E

Duration:

0.5 years full time
1 year part time

Intake:

Semester 1 & Semester 2

Campus:

On campus (Caulfield)

Credit points: 24

Entry requirements:

Applicants must have completed an Australian bachelor degree or equivalent qualification and a Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Graduate Certificate in Business

The Graduate Certificate in Business is designed for people who wish to enhance their knowledge and skills across the public, private and not-for-profit sectors. This is a stand-alone award or a popular pathway to progress to a graduate diploma or master's degree. The certificate provides a solid foundation in a variety of disciplines, including international business, marketing, public sector management or human resource management.

As part of this certificate you can choose any four introductory graduate-level units or four units from a single business discipline. Successful completion of the certificate may make you eligible for admission into a graduate diploma or master's degree.

Career outcomes

The Graduate Certificate in Business develops your skills across key areas of business. The certificate may also offer you a pathway into the Monash Business School's graduate diploma or a master's degree.

What will I study?

All students must complete

Four units (24 points)

Any four units from Monash Business School, with three units (18 points) at a graduate level.

Students need to seek advice regarding the selection of suitable units if considering a master's degree. Selection of some specific units may require Course Director approval.

Please refer to [study.monash](#) for a full list of units.

Choose broad business units or select units from a specific discipline of interest, such as marketing

Graduate Certificate in Business (24 points)

Credit points: 48

Entry requirements:

Applicants must have completed an Australian bachelor degree, an equivalent qualification or an approved pathway, and achieved a preferred Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Graduate Diploma in Business

The Graduate Diploma in Business is a stand-alone award or a popular pathway to a master's degree. It is designed to allow you to build on foundation units in a variety of business disciplines and to deepen your knowledge and skills in your particular area of interest. The program is recognised for its relevance and rigour and affords students the opportunity to work with academics and network with students who have relevant work experience and a keen interest in the discipline. Programs are interactive and taught in a variety of formats.

As part of this course, you can choose eight broad graduate-level units from within Monash Business School or eight units from a specific business discipline.

Successful completion may make you eligible for admission into a master's degree. (A minimum of four core units from the relevant master's degree must be completed).

Career outcomes

The Graduate Diploma in Business develops your leadership and organisational skills across key areas of business. The diploma also offers students a pathway into most of the Monash Business School's master's programs.

What will I study?

All students must complete

Eight units (48 points)

Any eight units from Monash Business School, with six units (36 points) at a graduate level.

The Master of Business is ideal for recent graduates without a business background or business graduates who are looking to develop further expertise to enter the corporate environment. This innovative and industry-focused course has a strong emphasis on personal development, ethics, corporate governance and social responsibility. It provides you with a broad-ranging master's degree in business or alternatively, it allows you to specialise in a business field of your choice.

The course offers several specialisations across information technology, law and responsible business, marketing, risk management, project management, managing human capital, responsible management, supply chain management and sustainability. The flexible course structure allows you to build a personalised master's degree, with the option to specialise in one of these nine areas and extend your skills in a specific discipline area.

A key feature of the Master of Business is the personal development program, which focuses on developing your leadership, team and interpersonal skills and is essential for every business professional. The program focuses on critical thinking, communication, and managing relationships. It also explores issues such as business ethics and corporate social responsibility.

The course is taught by experienced academics and industry experts to ensure it reflects current theory and practice.

Career outcomes

The strong reputation of the Master of Business means that our graduates are highly sought after, both in Australia and overseas. Graduates of the course pursue careers across the spectrum of industries including general management, human resources, marketing, project management and risk management.

Align your degree to your career goals by specialising in one of nine areas of business

Study as a pathway to a PhD in business

Sophie Mettrick
Master of Business alumnus
Strategic Marketing and Communications Executive,
Whitbread Insurance Brokers

"As a new graduate, the job market is challenging. You need that something extra to help you stand out from the crowd and improve your career prospects. The Master of Business expands your thinking, and assists you in developing a broader strategic focus. It promotes personal growth and empowers you with confidence in your ability and strong decision making skills in professional environments. What I enjoyed about the course was the ability to study specialised units in my area of business (marketing), while also gaining insight into other areas of business and management."

Read more of Sophie's story at business.monash.edu

Master of Business (continued)

Areas of specialisation

Information Technology

The information technology specialisation focuses on current practices and emerging strategies for information technology in a business context. You are introduced to management of the creation, storage, retrieval and dissemination of business data within organisation-wide frameworks. You will also gain a high-level understanding of the processes of project management.

Law and Responsible Business

Regulatory issues comprise an important part of the business environment. Units in this specialisation provide you with an understanding of how legal and social responsibility considerations impact upon business decision-making, as well as the legal considerations impacting other business functions such as corporate governance, taxation, marketing, corporate social responsibility and human resources.

Managing Human Capital

The managing human capital specialisation will equip you with an understanding of the theoretical foundations and practical issues of managing people in contemporary labour markets. The units provide a focus on strategic and operational people management issues as well as the broader international context facing today's managers. The specialisation also covers industrial relations, consulting, public sector management and general people management issues.

Marketing

The marketing specialisation focuses on the central concepts of marketing for businesses. The units provide both foundation concepts, as well as more advanced strategies for buyer behaviour, integrated marketing communication, marketing research, relationship marketing, innovation planning and assessing marketing performance.

Project Management

The project management specialisation gives you the practical skills required by project managers working in global environments. This specialisation focuses on modern approaches to project management, and includes key project management considerations such as business and project finances, designing business processes, technological tools for project management and other organisational functions.

Responsible Management

The responsible management specialisation will equip you with the theoretical foundations and practical skills for managing in a way that goes beyond recognition of finance imperatives. The units provide a focus on ethical management, corporate social responsibility and environmental sustainability, personal development and leadership in both domestic and international contexts.

Risk Management

The risk management specialisation explores current practices and emerging strategies for the application of enterprise-wide risk management (EWRM) in complex business structures. You will be introduced to the latest techniques and practices that allow the management of risk to be a value driver for business prosperity and survival.

Supply Chain Management

The supply chain management specialisation focuses on current practices and emerging strategies for improving supply chain performance. The units in the specialisation provide a focus on the strategic management of supply chains and on the design and optimisation of supply chains. They also cover the relevant business processes, managing innovation and sustainable operations management.

Sustainability

The sustainability specialisation focuses on current practices and emerging strategies for improving corporate sustainability. The units within the stream will provide insights into sustainability from the perspectives of governance, ethics marketing and management. This specialisation is suited to those who want to enhance their knowledge and skills in both business and sustainability issues and who seek employment in environmental governance or corporate sustainability management. It will also suit those who want to enable organisational and individual change in support of sustainability.

"My postgraduate studies have given me a wide range of skills that have helped me take my career to the next level, whether it be through the analytical tools to solve client issues or the ability to communicate across cultural boundaries.

I've become much more purposeful and process-driven in my approach to work, and my course offered a broad array of strategies and experiences, so that I always have something to fall back on even when I am tackling a project completely out of my comfort zone."

Students may be eligible for up to 48 credit points for previous graduate-level studies or an honours degree in a relevant discipline. Exemptions up to 24 credit points may be granted for previous undergraduate studies.

This course explores all aspects of business, financial and management accounting as well as providing you with the skills you need to work within the accounting profession. It is designed for recent graduates and professionals in the early stages of their careers who have a bachelor's degree in another field, and are seeking to complement it with a professional accounting qualification.

The course equips you for a career in accounting and may qualify you for membership with key accounting institutions and industry bodies, such as CPA Australia, the Institute of Public Accountants and the Institute of Chartered Accountants Australia.

The course is taught by a team of qualified academic staff, with experience at major accounting firms in Australia and overseas. Our academics include specialists in accounting information systems, auditing, financial accounting and management accounting to ensure that your skills reflect current business practices.

Career outcomes

A professional accounting qualification is highly valued in public and private organisations, and extends your career opportunities both within the accounting profession and in wider business environments. Graduates of this course have pursued careers as accountants in the finance sector, and as business professionals, in public practice and across the private and government sectors.

May qualify for membership to CPA Australia, the Institute of Public Accountants (IPA) and the Institute of Chartered Accountants Australia (ICAA)

Combine the Master of Professional Accounting with a Master of Business Law and graduate with two degrees in 2.5 years

Designed for people from non-accounting backgrounds

What will I study?

Non-business graduates must complete

Four business foundation units (24 points):

- Introductory accounting
- Law and business decisions
- Economics
- Business statistics

All students must complete

10 specialisation mastery units (60 points):

- Financial accounting
- Business finance
- Management accounting
- Advanced financial accounting
- Auditing and assurance
- Accounting information systems
- Advanced strategic management accounting
- Corporations law
- Taxation law
- Integrated accounting*

Two graduate-level accounting electives from the following list or other related units as approved by the Course Coordinator (12 points):

- Business accounting: strategic issues
- Financial statement analysis and business valuation
- Financial reporting issues
- International study program in accounting
- Forensic accounting and fraud examination
- Integrated systems for business enterprises

* This capstone unit and other designated specialisation mastery units incorporate the application of research principles including research methods applicable to the accounting practitioner's field of work.

Kate Hyland
Finance Manager (contractor)

"Adding postgraduate study to my CV put me ahead of others in job applications, as it shows potential employers that I am committed to furthering my education and developing my skills. For me, the most important outcomes from the Master of Professional Accounting were commencing study towards CPA/CA accreditation, broadening my financial knowledge and developing better business acumen. I feel that I am more confident in making financial decisions and I am much better at seeing the big picture rather than just focusing on the detail."

Master of Accounting

In this advanced degree you will extend your knowledge and expertise in accounting, and have the opportunity to focus on specific fields of practice, including accounting information systems, financial accounting, forensic accounting, auditing and management accounting. This course is designed for accounting graduates or accountants in the early stages of their careers, building on the knowledge developed in your undergraduate degree to provide you with high-level expertise across key fields of accounting practice.

The course features a structure with focused elective options so you can design a program that best suits your career goals. We also offer a range of study options, including full time and part time options and day and evening classes, to help you balance your work, study and personal commitments.

The Master of Accounting offers you a fast-track route to complete your professional recognition with the Chartered Institute of Management Accountants (CIMA). The course is taught by a team of qualified academic staff, and includes guest lectures and workshops from industry experts and leading practitioners, to ensure your knowledge is reflective of current practice. This course also offers a research pathway if you are interested in pursuing a PhD.

Career outcomes

Accountants with specialist expertise are in high demand. Graduates of the Master of Accounting work in public practice, and across the private and government sectors. They have careers in myriad of fields including auditing, taxation, management consulting, receivership, financial reporting, strategic business planning and management accounting.

Benefit from flexible study options, including day and evening classes, to help you balance work and study

Fast-track route to complete your Chartered Institute of Management Accountants (CIMA) professional qualification

This course equips you with the skills and knowledge to address the wide range of legal issues that arise in contemporary business. It is designed for graduates who need specialist legal knowledge in their roles, such as those in regulatory, compliance or risk-management positions.

The course will provide you with a well-rounded understanding of the legal environment and its impact on business practice in corporate governance, financial regulation, Asian and international business, human resources and workplace relations, marketing and taxation. It is ideal if you are looking to advance your legal literacy, which is increasingly important for employers when filling strategic and decision-making roles.

The units in the course offer a distinct business perspective on current legal issues and developments, in particular in fields such as regulation, compliance and risk-management. The course also allows you to complete commercial law units offered by the Faculty of Law. The range of units on offer enables you to tailor your degree to develop specialist legal knowledge in the areas most suited to your interests, career needs and goals.

The course gives you access to some of Australia's renowned educators in the fields of business and law. Our teaching staff have extensive industry experience, ensuring that your studies focus on current concepts and issues that are relevant to business today.

Career outcomes

The Master of Business Law provides you with skills and knowledge highly valued by employers in the private, government and international sectors. Graduates work across a wide range of business roles such as contract negotiation, business management compliance, and regulation and risk management, and in fields including accounting, finance, human resources and taxation.

Designed for those from non-law backgrounds

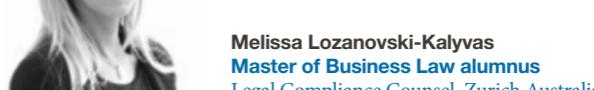

Combine the Master of Business Law with a Master of Professional Accounting and graduate with two degrees in 2.5 years

Choose from an extensive range of units and tailor your degree to meet your specific career needs and goals

Ideal if you have an interest in regulation and compliance, risk-management and Asian business law

Melissa Lozanovski-Kalyvas
Master of Business Law alumnus
Legal Compliance Counsel, Zurich Australia

"The Master of Business Law reflects practical legal literacy and business law expertise in the corporate world. During my time at Zurich, I recognised that my Bachelor of Laws didn't give me the practical and business understanding required work in-house for a global organisation. I needed more insight to the corporate world, and felt that the Master of Business Law provided me with the opportunity to broaden my legal and business knowledge and skills to help in my day-to-day job. It also allowed me to tailor a program to complement my professional expertise, and pursue a career pathway as Legal Compliance Counsel for a global insurer."

Master of International Business

Course suitability

Suitable for new graduates
Develop new skills/
career change

Course details

Course code: 2098
CRICOS code: 082334K

Duration:

2 years full time
4 years part time

Students may be able to complete with 72 credit points in 1.5 years full time or 3 years part time.

Intake:

Semester 1 & Semester 2

Campus:

On campus (Caulfield)

Exit points:

Graduate Certificate in Business (24 points)

Graduate Diploma in Business (48 points)

Credit points: 96

Entry requirements:

Applicants must have completed an Australian bachelor's degree or an equivalent qualification and achieved a Weighted Average Mark (WAM) of 55 per cent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Recognition for prior learning:

Students may be eligible for up to 48 credit points for previous graduate-level studies or an honours degree in business. Exemptions up to 24 credit points may be granted for previous undergraduate studies.

The Master of International Business is a program that encapsulates the importance of the international environment in the functioning of politics and business.

The breadth of knowledge in this domain has seen the establishment of two different streams of study in the course – an International Business stream and a Diplomacy and Trade stream. Applicants can choose either stream of study.

The International Business stream has a business-oriented focus, seeking to advance your knowledge of the international environment in which firms and their managers operate. It considers issues such as international trade, the internationalisation of operations and corporate strategy. It will advance your business and management knowledge and give you the tools to operate from a global perspective. You will develop the capacity for advanced analysis of firm internationalisation, international trade, and corporate strategy, and gain an appreciation of the multinational firm, the environment in which it operates, and the activities required of the international manager.

The Diplomacy and Trade stream has a political economy focus looking to advance your knowledge of the inter-relationships between international politics, diplomacy, economics, international trade, international law and international development. It will advance your knowledge across international trade, diplomacy, economics, international law, international development and contemporary international politics, with a focus on international development issues. You will gain a solid understanding of the issues facing international trade and development across the globe, and develop essential skills such as evaluating key trends in foreign and trade policy, understanding the implications of international trade rules and providing policy advice in the areas of foreign affairs, trade and development and international business.

Acquire a perspective on multinational corporations

Tailor your degree to your personal interests and career goals.

Learn from leading academic and industry experts

Study as a pathway to a PhD

Career outcomes

The program enables students to gain the appropriate knowledge and analytical skills that can be applied in a variety of organisational settings including the corporate, governmental and non-profit sectors. Career opportunities are available in a range of private firms, small, medium sized and larger multinational enterprises that operate in a variety of industry sectors including: manufacturing and service, export and trade, travel and tourism, consulting and research. Employment opportunities also arise in government departments and institutions, NGOs and international organisations.

"The Master of International Business provides graduates with the knowledge and analytical skill set to better understand, evaluate and interpret the workings of global business. For those of you working or looking to enter the workforce, this knowledge and skill set can be used and applied in firms and organisations with a domestic and or an international focus, in a variety of organisational settings and industries, across both the corporate and non-corporate sectors."

Dr Paul Kalfadellis

Course coordinator, Master of International Business

What will I study?

If you have completed an undergraduate degree in a relevant discipline:
Sections B and C

If you have completed an undergraduate degree in a non-relevant discipline:
Sections A, B and C

If you have completed an honours degree in a non-relevant discipline:
Sections A and B

If you have completed an honours degree in a relevant discipline:
Section B

Section A

Four units (24 points) from the following:
– Accounting for business
– Law and business decisions
– Economics
– Business statistics
– Foundations of management
– Advanced marketing communication.*

* This unit is only available to students who have completed the specified unit prerequisite or can demonstrate to the satisfaction of the Course Coordinator, the completion of an undergraduate major in marketing.

Section B

Eight core units (48 points) as follows:
– Accounting and finance for international managers
– International trade law
– Introduction to international economics
– International business strategy
– International management
– Cross-cultural management communication
– International business theory and practice
– Marketing and the international consumer

Section C

Four graduate-level units subject to Course Coordinator, approval and the following conditions:
– a maximum of two elective units (12 points) may be taken from other faculties
– students interested in pursuing doctoral (PhD) studies can choose the three-unit research report elective option.

Please refer to [study.monash](#) for a full list of available units that fulfil the requirements of Section C.

Students may be eligible for up to 48 credit points for previous graduate-level studies or an honours degree in business. Exemptions may be granted for previous undergraduate studies.

This course will advance your knowledge across international trade, diplomacy, economics, international law and contemporary international politics.

It is designed for people at the start of their careers as well as people working in the field who want to develop their careers within NGOs, government departments such as the Department of Foreign Affairs and Trade, the United Nations and corporate organisations working in international business environments.

The Master of Diplomacy and Trade is the only postgraduate course in Australia that offers a combination of foreign affairs and international trade policy subjects, with a focus on international development issues. In this course you will gain a solid understanding of the issues facing international trade and development across the globe.

You will also develop essential skills such as evaluating key trends in foreign and trade policy, understanding the implications of international trade rules and providing policy advice in the areas of foreign affairs, trade and development and international business.

The course gives you access to some of Australia's renowned educators in the fields of politics, diplomacy and international trade. Our teaching staff and professors have extensive research and industry experience, to ensure the course covers new and emerging issues.

Career outcomes

The Master of Diplomacy and Trade is designed to further your career in the diplomatic service, NGOs and business organisations where an understanding of international relations, politics, international law, economics and trade are essential.

Study the only Australian graduate course that focuses on foreign affairs, international trade and international development

Benefit from flexible study options, including on-campus or off-campus, day and evening classes, to help you balance work, study and personal commitments

Become part of network of alumni employed in senior government positions, NGOs and international organisations

Benjamin Hawkins
Master of Diplomacy and Trade alumnus
Policy Analyst, Airconditioning and Mechanical Contractors' Association

"The Master of Diplomacy and Trade is exceptionally unique. Firstly, it requires you to have a cross-disciplinary curiosity: economics, international law, international politics, policy, governance, etc. All colleagues I studied with had a strength or background in one area or another, but all were challenged by the need to expand their knowledge base to new disciplines. Secondly, and most rewardingly, it provides the opportunity to associate daily with people from right across the world. By the end of semester one I had new friends from South Asia, South East Asia, Continental Europe, Africa, Russia, North and South America. This is a privileged situation, because when studying international politics and governance, theory almost becomes practice simply by having a discussion with the person next to you."

Read more of Benjamin's story at [business.monash.edu](#)

"For me, the main advantage of postgraduate study was that it opened up multiple career paths. From research, to policy work, to advocacy, three viable and alternative career paths presented themselves.

While studying has certainly helped me understand our business better, I'm also glad the research we did partnered with the Kenyan Human Rights Commission. There are some incredible researchers there, truly inspiring, and my hope is that our work might be a helpful part of their larger research projects."

Murray Benton
Master of Diplomacy and Trade alumnus
Managing Director, Agency

Master of Applied Finance

Course suitability

Campus:
On campus (Caulfield)

Exit points:
Graduate Certificate in Business (24 points)
Graduate Diploma in Business (48 points)

Credit points: 72

Entry requirements:

Applicants must have completed an Australian bachelor's degree with a major in finance; or an Australian bachelor degree with significant work experience in the finance industry; or an equivalent qualification. Applicants will be ranked accordingly based on their entire academic record, and a Weighted Average Mark (WAM) of 65 per cent is preferred.

Recognition for prior learning:

Students may be eligible for up to 36 credit points for previous graduate-level studies or an honours degree in finance.

In this course you will acquire advanced expertise in quantitative and qualitative finance, across areas such as global financial markets, financial planning, money markets, and funds management. Designed for recent finance graduates and professionals in the early stages of their finance careers, the course covers specific areas of finance, and is a CFA Program Partner of the CFA Institute, the global association for investment professionals that awards the CFA Financial Analyst® Designation.

As part of the Master of Applied Finance, you can choose from a wide range of elective units, which gives you the ability to explore the areas of finance and business that relate to your personal interests and career goals.

The course also offers flexible learning options, with day and evening classes, to help you balance work, study and personal commitments.

The course gives you access to some of Australia's leading academics in the field of finance, as well as industry experts who draw on their experience to ensure your studies focus on current concepts and issues. You will learn in our state-of-the-art Simulated Teaching and Research Laboratory (STARLab), to gain valuable practical trading experience.

Career outcomes

The Master of Applied Finance gives you the skills to work across the financial sector, both in Australia and overseas. Graduates have pursued careers as analysts, brokers, merchant bankers, dealers and advisers in large financial institutions and consultancy firms.

Flexible study options, including day and evening classes to help you balance work, study and personal commitments

Master of Actuarial Studies

In this course you will acquire advance expertise in statistics, econometrics, finance, economics and mathematics. It is designed for recent actuarial graduates and professionals in the early stages of their business careers, who want to pursue actuarial and risk management roles. The course covers specific areas of actuarial practice, and may include exemptions for Part I and Part II of subjects of the Institute of Actuaries of Australia.

As part of the degree, you can choose a wide range of elective units, across the fields of econometrics, actuarial practice, economics, business modelling and finance, which will give you the flexibility to tailor the course to your personal interests and career goals.

As well as developing essential mathematical skills, the course also focuses on developing your wider business awareness skills including communication, critical thinking, actuarial judgement and professionalism.

The course gives you access to some of Australia's renowned actuarial educators and practising actuaries with extensive industry experience, to ensure your studies focus on current concepts and issues that are relevant to business today.

Career outcomes

The Master of Actuarial Studies gives you the skills to work across the spectrum of industry sectors, in both Australia and overseas, in risk management and actuarial roles. Graduates have pursued careers as actuaries, forecasters, risk managers, analysts, and advisers in large financial institutions, insurance and risk firms and consultancies across the world.

Study advanced statistics, econometrics, finance and economics

Achieve exemptions for Parts I and II of subjects of the Institute of Actuaries of Australia

Tailor your course to your interests with a wide range of elective units

Learn from leading actuarial academics and practising actuaries

"The Master of Actuarial Studies is ideal for students with a numerical background and an appetite for business who wish to apply high-level mathematical modelling skills in the field of risk management within life, non-life, finance and corporate organisations."

Dr Colin O'Hare, PhD, FIA
Course Coordinator, Master of Actuarial Studies

Master of Applied Econometrics

This advanced degree combines coursework and research elements to equip you with the skills and research experience required for applied econometric projects. Designed for recent econometrics and statistics graduates and those in the early stages of their business careers, the course offers a comprehensive curriculum across applied econometrics, time series analysis, financial econometrics, microeconomics and econometric theory.

The course gives you the skills to design and implement applied econometric projects for the government and business sectors, or pursue a PhD.

As part of the Master of Applied Econometrics, you can choose from a wide range of elective units, which gives you the flexibility to explore the areas of econometrics and business that relate to your personal interests and career goals.

The course gives you access to some of Australia's leading academics in the field of econometrics and business statistics, as well as industry experts who draw on their experience to ensure your studies focus on current concepts and issues.

Career outcomes

Econometrics skills are in high demand, and graduates of the Master of Applied Econometrics are well prepared for professional careers in which econometrics is applied to quantitative problems across the fields of economics, finance, risk management and international business.

Many graduates work in government organisations, such as the Australian Bureau of Statistics, or in financial or insurance institutions, both in Australia and overseas.

Develop your quantitative and analytical skills

Study a comprehensive curriculum of financial econometrics, time series analysis and forecasting, and applied econometrics

Anne Flaherty
Master of Applied Econometrics alumnus
Research Analyst, CBRE

"The Master of Applied Econometrics expands your knowledge of statistical modelling, and teaches you to apply these skills to a wide range of practical problems. In particular, this course equips you with the skills required to effectively analyse and draw insights from the data. It's quite rare to find a master's qualification focused exclusively on econometrics, which is what attracted me to this course and to Monash Business School. They are one of very few institutions with a whole department dedicated to teaching and research in econometrics and business statistics."

Read more of Anne's story at business.monash.edu

"As the Monash Business School, we pride ourselves on providing programs that are best suited to today's societal needs. Fundamentally, our programs are designed to do two things; encourage our students to think critically and creatively about issues of importance to business, and developing the technical and professional development skills that assist graduates in pursuing the careers of their choice.

Through a variety of curricula and co-curricular activities, students learn about solving problems, communicating effectively, self-management, leadership and team work, and the need for life-long learning and development. This combination of rigour and relevance is the reason why employers want graduates of Monash Business School."

Dr Nell Kimberley
Associate Dean (Learning and Teaching)

Off campus

Credit points: 24

Entry requirements:

Applicants must have completed an Australian bachelor degree or an equivalent qualification. Applicants will be ranked based on relevant work experience and their entire academic record, with a 55% average preferred.

Graduate Certificate in Pharmacoeconomics

This course focuses on the economics of pharmaceuticals in healthcare systems. It is designed for professionals in the pharmaceutical industry seeking an understanding of the economics of pharmaceuticals in the healthcare system. It is relevant for clinicians, health professionals and those involved in the production, use and delivery of healthcare programs.

You will acquire the skills necessary to apply economic analysis to the evaluation of products and gain an understanding of the broad policy issues affecting the industry.

Areas of study include cost-effectiveness analysis of a drug, economic modelling to support the inclusion or exclusion of a drug on a national or hospital formulary, design of a clinical trial to evaluate the efficacy and cost-effectiveness of drugs, and methods of evaluation of health and non-health outcomes of drug use.

If you successfully complete the Graduate Certificate in Pharmacoeconomics you may be eligible to apply for admission to the Graduate Diploma in Health Economics and Policy.

Career outcomes

The Graduate Certificate of Pharmacoeconomics provides graduates with the expertise to pursue careers in academia, in the health sector, corporations and private health providers, as administrators in the health sector or as healthcare program evaluators.

Ideal for pharmaceutical and health industry professionals seeking further knowledge

Delivered by Monash University's Centre for Health Economics – a leading centre for health economics teaching and research in Australia

Learn from industry professionals and economic experts

Study as a pathway to the Graduate Diploma in Health Economics and Policy

"The Graduate Certificate in Pharmacoeconomics equips students with an understanding of the pharmaceutical industry, trains students in the application of economic methods to analyse industry policy, and prepares students with the necessary technical skills to rigorously evaluate the cost-effectiveness of pharmaceuticals."

Associate Professor Duncan Mortimer, PhD
Head of Teaching, Centre for Health Economics

What will I study?

All students must complete

Three units (18 points) as follows:

- Introduction to health economics
- Introduction to epidemiology and biostatistics
- Pharmaceutical economics

One of the following three units (6 points):

- Economic evaluation in health care
- Applied health economics and health policy
- Principles of health economics for developing countries

Graduate Certificate in
Pharmacoeconomics
(24 points)

Credit points: 48

Entry requirements:

Applicants must have completed an Australian bachelor's degree or an equivalent qualification. Applicants will be ranked based on their entire academic record, and a 55 per cent average is preferred with due consideration given to relevant employment experience.

This course focuses on economic issues facing the delivery and regulation of healthcare programs and is designed for health professionals, clinicians, and policy makers who work in the production, use, delivery and regulation of healthcare programs and interventions.

The course will provide you with a sound knowledge of economic evaluation, health economics and international health economics and policy, and does not require a background in economics.

It is delivered by the Centre for Health Economics, which has one of the largest concentrations of senior health economists in the country and has been at the forefront of health economics teaching and research in Australia for almost 20 years. Units are taught by leading academics and industry experts focused on producing innovative solutions to health economics problems.

Career outcomes

The Graduate Diploma of Health Economics and Policy provides graduates with the expertise to pursue careers in academia, in the health sector, corporations that deliver consumer health products or for private healthcare providers.

Designed for health industry professionals who do not have a background in economics

Delivered by Monash University's Centre for Health Economics – a leading centre for health economics teaching and research in Australia

Learn from industry professionals and economic experts

"The Graduate Diploma in Health Economics and Policy provides students with a rigorous and theoretical grounding in the disciplines of economics, health economics and health policy. It prepares students to apply the theory and methods from these disciplines to the analysis of health care policy and institutions."

Associate Professor Duncan Mortimer, PhD
Head of Teaching, Centre for Health Economics

What will I study?

Graduate Diploma in Business (48 points)

Credit points: 96

Entry requirements:

Applicants must have completed an Australian bachelor degree or an equivalent qualification and a Weighted Average Mark (WAM) of 60% or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Recognition of prior learning:
Students may be eligible for up to 48 credit points for previous graduate-level studies or an honours degree in business. Exemptions up to 24 credit points may be granted for previous undergraduate studies.

This course provides you with an advanced theoretical understanding of economics and its application to government and business decision-making. It is designed for early career economists and recent graduates who want to develop their expertise in applied economic tools and to undertake independent research. It is ideal if you are looking to extend your knowledge of economic analysis in the global economy, and focuses on areas of business strategy, competition policy, economic policy, project evaluation, pricing and risk and regulation.

The course provides you with access to some of Australia's renowned leaders in economics. The Department of Economics is well regarded for outstanding strengths in research – our academics publish in a wide range of top-ranking journals in economics, and the department has been ranked first in the Oceanic region by Research Papers in Economics (RePEc) for experimental economics. The department has also received a five-star ranking in economics from Excellence in Research for Australia (ERA).

As part of your studies, you will have the opportunity to work with and learn from academics who are at the forefront of economics research.

Our economics department provides top-level specialist advice to government and the private sector in Australia and internationally, and has developed advisory contacts in the Asia-Pacific region, as well as close connections with prestigious academic and policy-formulating institutions in China, Europe and the United States.

You will also have the opportunity to participate in events such as our Distinguished Visitor Series, which has previously included seminars from prominent economists such as Richard Zeckhauser from Harvard University, John List from the University of Chicago and Yves Zenou from Stockholm University.

Career outcomes

The Master of Business Economics provides graduates with career opportunities in the public sector, across government departments, allied agencies and non-government organisations. Graduates have also found work in the private sector in consulting firms, banks and financial institutions and market research firms.

Gain valuable research experience through our links with national and international government and private sector bodies, and undertake independent research

Study at a university that is ranked first in Australia for experimental economics by IDEAS and Research Papers in Economics and received a 5/5 for Economics by Excellence in Research Australia

Develop advanced expertise in applied economic tools and economic analysis

Learn from leading economists through our Distinguished Visitor Series

"When I reached the end of my undergraduate degree and just didn't feel I had finished learning about economics.

My undergraduate studies were fantastic, but I wanted to develop more specialised skills and knowledge.

The Master of Business Economics offers a fantastic balance. The research units were fascinating and an interesting insight into the world of guided research, while the coursework units satisfied my hunger for theoretical learning."

Claire Impey
Master of Business Economics student

2 years full time

Intake:
Semester 1

Campus:
On campus (Clayton)

Credit points: 96

Entry requirements:
Applicants must have completed an Australian bachelor degree or an equivalent qualification in mathematical or quantitative studies, or with a major in economics and a Weighted Average Mark (WAM) of 70 percent or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Master of Economics

This course provides you with skills in advanced economic tools and experience in undertaking independent research. It is designed for recent economics graduates and economists in the early stages of their careers. It is ideal if you are interested in pursuing a PhD in economics, as it will give you the opportunity to present research ideas and concepts in a public setting.

The course content is directly informed by, and reflects, the current and ongoing research of our lecturing staff. The Department of Economics is well regarded for outstanding strengths in research – our academics publish in a wide range of top-ranking journals in economics, and the Department has been ranked first in the Oceanic region by Research Papers in Economics (RePEc) for experimental economics. The Department has also received a five-star ranking in economics from Excellence in Research for Australia (ERA).

As part of your studies, you will gain valuable research experience through the Department of Economics' strong links with industry. The Department provides top-level specialist advice to government and the private sector in Australia and internationally, and has developed advisory contacts in the Asia-Pacific region, as well as close connections with prestigious academic and policy-formulating institutions in China, Europe and the USA.

You will also have the opportunity to participate in events such as our Distinguished Visitor Series, which has previously included seminars from prominent economists such as Richard Zeckhauser from Harvard University, John List from the University of Chicago and Yves Zenou from Stockholm University.

Career outcomes

Master of Economics graduates work as professional economists, conducting research and economic analysis for the public sector, mainly in government departments, allied agencies and non-government organisations. Graduates have also found roles in the private sector, in consulting firms, banks and financial institutions and market research firms.

Study at a university that is ranked first in Australia for experimental economics by IDEAS and Research Papers in Economics and received a 5/5 for Economics by Excellence in Research Australia

Gain valuable research experience through our links with national and international governments and the private sector

Study as a pathway to a PhD in economics

Learn from leading economists through our Distinguished Visitor Series

"The Master of Economics is an effective path to pursue a PhD in Economics. The advanced coursework and research component pairs students with our internationally-leading scholars to undertake a research project, so you will effectively grasp the skills in pursuing a scholarship career, or be qualified for an industry post with research responsibilities."

Associate Professor He-Ling Shi
Course Coordinator, Master of Economics

What will I study?

- Public economics
- Information, incentives and games
- Any fourth year unit offered by the Department of Economics not previously completed.

“My goal for the future is to empower Australian companies, both SMEs and large corporations alike, to be adaptive and innovative. This will require careful and strategic consideration of future investment in emerging technologies. The knowledge

I've developed during my postgraduate studies at Monash Business School have given me the skills to go out and educate and inform companies of the risk and reward of these decisions."

Caitlin Bonwick

Master of Business (Science & Technology) alumnus
Research and Development Incentives Consultant, KPMG

On campus (Caulfield)
Off campus

Exit points:
Graduate Certificate in Business (24 points)

Credit points: 48

Entry requirements:
Applicants must have completed an Australian bachelor's degree or an equivalent qualification. Applicants will be ranked based on their entire academic record, with a 55 per cent average preferred and a requirement of two years' work experience.

Graduate Diploma in Human Resource Management

This program will provide you with sound knowledge and skills in the field of HRM, enabling you to develop expertise across the field of HRM issues, including industrial relations and other management practices. The course is designed for students who are looking to develop HRM skills as well as those who are currently working in human resources or related fields and wish to gain professional qualifications.

Taught in seminar-style classes, this course will provide you with an opportunity to learn from industry-relevant guest speakers and network with other professionals working in the field.

This course also provides a pathway for you to continue your studies in the Master of Human Resource Management.

Career outcomes

The Graduate Diploma provides you with knowledge and skills to work across the wide field of HRM, including talent management, people and culture, recruitment and selection, pay and benefits, HR planning, international HRM, employee development, employee relations, consulting and performance management.

Benefit from flexible study options, including off-campus options, to help you balance work, study and personal commitments

Learn from senior HRM practitioners and private and public sector leaders

Accredited by Australian Human Resources Institute (AHRI)

Access to the latest trends and developments in HRM through our strong links with organisations and cutting-edge research

Study as a pathway to the Master of Human Resource Management

"The HR industry relies on professionals who are able to critically analyse data and make logical judgements. For me, my greatest outcome of study was that it challenged my way of thinking and perspective on several issues, allowing me to reflect on topics that were relevant to my work and career."

Alaynna Elliot

Human Resource Management alumnus
Manager, HR Development & Talent Management
Mercedes-Benz Australia/Pacific

Read more of Alaynna's story at monash.edu/business-economics/postgraduate

What will I study?

All students must complete

Three core units (18 points)

- Strategic human resource management
 - Managing people and organisations
 - Human resource management
- Plus one of the following units (6 points):
- People management and work in a global context
 - Work and employment relations

Four graduate-level units (24 points) subject to the following conditions:

- A maximum of two elective units (12 points) may be taken from other faculties.

It is recommended that students consult with the Course Coordinator to ensure their elective units form a coherent study program.

Please refer to study.monash for a full list of available units.

Students may be eligible for up to 36 credit points for previous graduate-level studies or an honours degree in business.

Master of Human Resource Management

This is a comprehensive course that focuses on developing your expertise in contemporary HR issues. It is designed for current and aspiring HR professionals who are seeking specialist training for career progression. It is ideal if you are looking to develop HRM skills or are working in HRM or related fields, such as industrial relations, employee development, HR planning or leadership.

You will learn how to develop HR policy, deal with organisational change and talent management, manage employment issues such as industrial relations, employee development, HR planning and leadership.

The course incorporates the latest trends and developments in human resources. It is delivered by leading professors and qualified academic staff who are at the cutting-edge of HR research, as well as experienced and prominent guest speakers from the private and public sectors and consulting, to ensure the course reflects contemporary practice.

The course has a flexible structure and includes innovative teaching and learning practices that focus on developing your high-level management and leadership skills. The course also includes flexible study options, enabling you to study full or part time, and on or off campus.

Career outcomes

The Master of Human Resource Management gives you the skills to work across the wide field of HRM including talent management, people and culture, recruitment and selection, pay and benefits, HR planning, international HRM, employee development, employee relations, consulting and performance management. Graduates work in these areas across the private and public sectors.

Benefit from flexible study options, including off-campus options, to help you balance work, study and personal commitments

Learn from senior HRM practitioners and private and public sector leaders

Accredited by Australian Human Resources Institute (AHRI)

Develop high-level management and leadership skills

Access to the latest trends and developments in HRM through our strong links with organisations and cutting-edge research

"Postgraduate study is viewed favourably in the industry as it demonstrates a desire to learn and develop skills that can be used in the workplace, which I found particularly relevant when studying. Now I can actively participate in broader business decisions and I feel confident in the various decision-making areas."

Nicole Seiffert
Master of Human Resource Management alumnus

Head of Recruitment and Culture, MessageMedia

Recognition for prior learning:

Students may be eligible for up to 36 credit points for previous graduate-level studies or an honours degree in a relevant discipline.

This course, which explores the dynamics between governments and emerging issues that affect all levels of government, will provide you with a deeper understanding of management challenges in government, and equip you to respond to public policy issues. It will also provide you with the skills to drive improved performance across the spectrum of public sector activities, and is designed for experienced professionals who are working or aspire to work, in senior roles within the public sector, or who require an understanding of the public sector.

Continuous improvement and reform are recurring themes for governments throughout the world. These require the knowledge and skills to understand, manage and adapt to change in fields as diverse as governance, service delivery, management and public enterprise. Global moves towards competitive, flexible and managerial models of public administration force political leaders and managers to face challenges such as sophisticated regulation of privatised utilities, managing contracted services and active engagement with citizens. These challenges are likely to continue for the foreseeable future.

The program provides managers with the analytical and managerial skills to deal effectively with continued pressure for reduced budgets, more rigorous accountability and improved services, and promotes the practical and relevant capabilities you need for professional development.

The course can be taken by professionals from all around Australia, and many of our students work in national, state or local governments, the not-for-profit sector or private agencies servicing government. We offer small classes to facilitate interactivity and engagement, and your student cohort will provide excellent opportunities to network and learn from peers from a range of backgrounds and jurisdictions. Upon graduation you will also become part of our alumni network employed in senior positions in government and the broader public sector in Australia and overseas.

The course is taught by qualified academic staff and industry experts who have extensive practical and relevant experience in the fields of public policy and management and uses a mix of teaching modes in order to support your professional and working lives.

The course is offered in both on and off-campus study mode, with some units offered in intensive block mode, enabling you to complete some units on campus within a shorter time frame.

Career outcomes

The Master of Public Policy and Management will provide you with the skills to respond to management and policy challenges at senior levels in the public, private and not-for-profit sectors. Graduates have pursued careers in a very broad range of senior policy and leadership roles within local, state, and national governments in Australia and elsewhere, as well as positions in NGOs and organisations delivering services to government.

Develop high-level

Roni (Veronica) Beauchamp
Master Public Policy and Management alumnus
Healthy Living Manager (Victoria), National Heart Foundation of Australia

"Prior to joining the National Heart Foundation, I worked in local government for more than 15 years, with shorter stints in national government. Once I had decided that a master's-level qualification was needed to take the next step in my career, I looked around to find a suitably challenging and interesting one. I chose the Master of Public Policy and Management as it aligned well with the roles I was most interested in. Many courses focus on the private sector, so it was enormously beneficial to be able to study content that focuses so much on the public sector."

Students may be eligible for up to 48 credit points for previous graduate-level studies or an honours degree in business. Exemptions may be granted for previous undergraduate studies.

This course is designed for experienced professionals in any business domain who seek cutting-edge theoretical knowledge and problem-solving skills in marketing.

The course is taught by leading academics and industry experts with a focus on contemporary concepts and issues. Historically, this flagship degree attracts a large number of professionals working in the corporate sector, providing you with valuable networking and knowledge-sharing opportunities.

The core units of this course have been strategically developed in consultation with our industry advisory board to promote leadership, as well as expert knowledge, in our graduates.

Our timetable offers flexible study options to suit your busy work schedules and personal commitments. Some units are offered in intensive five-day blocks, or two-day split blocks, in addition to evening classes and online options.

The range of elective units on offer allows you to customise the course to suit your professional interests and career goals, and includes the opportunity to undertake a corporate project under supervision.

Professionals seeking a marketing career with a global enterprise are encouraged to participate in one of our global study programs in marketing.

Career outcomes

Senior marketing career opportunities exist across all industries. Our alumni currently work in a range of industries, such as financial services, legal firms, business consulting firms, advertising agencies, market research companies, pharmaceutical and health companies, fast-moving consumer goods, retailing, not-for-profit organisations and government.

Study with Australia's leading provider of marketing education and join our marketing alumni throughout Australia, and around the globe

Benefit from flexible study options to help you balance work, study and personal commitments, including evening classes, intensive five-day blocks or two-day split blocks, and off-campus units

Choose from an extensive range of units to customise your degree to your professional interests and career goals

Learn from leading academics and industry experts with a focus on contemporary concepts and issues

Invitations to attend industry and alumni events, including business breakfasts and marketing research briefings.

Please refer to [study.monash](#) for a full list of available units.

Mitchell Alexander
Master of Marketing student
Stakeholder Engagement Advisor, SBS

"The Master of Marketing is an engaging and interesting course that illustrates the role of marketing in the modern economy, and how marketing can provide value to any business. The degree has made me much more aware of the many facets of marketing that are at play in the economy, and more than ever, I am fascinated by the interaction between consumers and businesses. What I've really enjoyed is the opportunity to apply cutting-edge theoretical thinking to practical scenarios, both in the classroom and the workplace."

Read more of Mitchell's story at [business.monash.edu](#)

"I have a passion for social justice, particularly in the area of Indigenous affairs. I chose to study at the Monash Business School, with the hopes of securing a role in policy or senior management within the public sector."

I wanted a course that would equip me with the range of managerial and analytical skills necessary to meet the complex challenges that face senior level management in the public sector today, and an appreciation of broader systems of governance, necessary in order to navigate the increasingly complex matrix of socio-economic, political and cultural factors that influence an organisation's operations."

Blake Cansdale
Master of Public Policy and Management student
Lecturer, Tranby Aboriginal College

Master of Professional Accounting and Master of Business Law

Course suitability

Graduate Certificate in Business (24 points)
Graduate Diploma in Business (48 points)
Or either of the single master's degrees subject to satisfying the requirements of the single degree

Credit points: 120

Entry requirements:
Applicants must have completed an Australian bachelor degree in a non-accounting discipline and achieved a Weighted Average Mark (WAM) of 60% or an equivalent GPA as determined by the Faculty. Applicants will be ranked and selected based on their entire academic record.

Recognition for prior learning:
Students may be eligible for up to 60 credit points for previous graduate-level studies or an honours degree in business. Exemptions may be granted for previous undergraduate studies.

In this advanced dual degree you will develop your knowledge and expertise in accounting and develop the skills to address the wide range of legal issues that arise in contemporary business. You have the opportunity to focus on specific fields of accounting practice, including accounting information systems, financial accounting, forensic accounting, auditing and management accounting, alongside study of the legal environment and its impact on business practice in corporate governance, financial regulation, Asian and international business, human resources and workplace relations, marketing and taxation.

The course is designed for those who need specialist legal knowledge in their roles, such as those in regulatory, compliance or risk-management positions, who want to combine this knowledge with an advanced accounting qualification.

The course is taught by a team of qualified academic staff, and includes guest lectures and workshops from industry experts and leading practitioners, to ensure your knowledge reflects current practice.

Career outcomes

Accountants with specialist legal expertise bring a unique skill set to the workplace. Graduates of the Master of Professional Accounting and Master of Business Law double degree work either as accountants in public practice, and across the private and government sectors, or across a wide range of business roles. Fields may include finance, management consulting, contract negotiation, business management compliance, regulation and risk management, financial reporting and strategic business planning.

Graduate with two master's degrees in 2.5 years

Develop a unique skill set with capabilities across accounting and business law

Choose from an extensive range of units and tailor your degree to meet your specific career needs and goals

Benefit from flexible study options, including day and evening classes, to help you balance work and study

"Undertaking an accounting degree that leads to professional accreditation is beneficial, and adding a complementary degree in business law provides flexibility in the job market and opportunities for specialisation within the profession."

Dr Andrzej Ceglowski

Course Coordinator, Master of Professional Accounting

Credit points: 120

Entry requirements:
Applicants must have completed an Australian bachelor degree with a major in finance or an equivalent qualification.
Applicants must have achieved a credit or equivalent in an introductory multiple regression unit at tertiary level. Applicants will be ranked accordingly based on their entire academic record, with a preferred Weighted Average Mark (WAM) of 65% and with due consideration given to relevant employment experience.
Average Mark (WAM) of 65% and with due consideration given to relevant employment experience.

Recognition for prior learning:
Students may be eligible for credit to a maximum of 50 per cent of course requirements for previous graduate-level studies or up to 40 per cent of course requirements for an honours degree in finance or econometrics. Credits or exemptions of up to 24 credit points may be granted for previous undergraduate studies in finance.

Students who enter the course with an undergraduate degree in business or economics or statistics and have achieved at least 65 per cent (or equivalent) in an introductory regression subject are eligible for credit for up to three units chosen from units at level 2 and 3 in parts (a.) and (b.) in the 'requirements' for this course.

Master of Applied Finance and Master of Applied Econometrics

In this dual degree you will develop advanced expertise in quantitative and qualitative finance, across areas such as global financial markets, financial planning, money markets, and funds management, combined with the skills and research experience required for applied econometric projects.

Designed for recent finance and econometric graduates and professionals in the early stages of their careers, the course covers specific areas of finance, financial econometrics, applied econometrics and time series analysis.

As part of the double master's degree, you can choose from a wide range of elective units across both finance and applied econometrics, which gives you the flexibility to explore the areas that relate to your personal interests and career goals. The course also offers flexible learning options, with day and evening classes, to help you balance work, study and personal commitments.

The course gives you access to some of Australia's leading academics in the field of finance and econometrics, as well as industry experts who draw on their experience to ensure your studies focus on current concepts and issues.

Career outcomes

This double degree gives you a unique skill set, and the ability to work across the financial and insurance sectors, both in Australia and overseas. Graduates have pursued careers as analysts, brokers, merchant bankers, risk managers, market researchers and advisers in large financial institutions and consultancy firms.

Graduate with two master's degrees in 2.5 years

Develop a unique skill set with capabilities across finance and econometrics

- Modelling in finance and insurance

"In the Monash MBA, economics concerns itself with equipping people with additional tools to solve business problems. The right solution asks the right questions such as how do I begin to understand the business landscape at the organisational, market and economy-wide level? Who are my competitors and what is my comparative advantage? How do I create value?"

These are the questions that we pose to managers in the Monash MBA. The challenge is to help MBA students transfer these questions from textbook or case examples into their own business environment. The reward is making these connections and seeing an exciting transformation in the cohort as they begin to apply new perspectives to business strategy."

Dr George Rivers
Associate Dean (Research)

The Monash Executive MBA

The Monash Executive MBA is one of the world's top MBA courses, specifically developed for experienced professionals with the ambition to take their already successful careers to the next level.

This sophisticated educational experience is designed to develop executives with a global perspective, who are transformational and socially responsible.

Stephen Tyson
MBA Alumnus
Australasian Strategy Manager, Golder Associates

"The MBA program has encouraged me to think differently. It takes you outside of your comfort zone, challenges you and provides you with the tools to think laterally and provide creative solutions. It has helped me grow both professionally and personally. I am more confident and I attribute that to the skills, knowledge and friendships developed during the course of the program."

Course details

Course code: 4437
CRICOS code: 079045A

Duration:
2 years

Intake:
February

Campus:
On campus (Caulfield)

Entry requirements:
Applicants must have completed an Australian bachelor degree or an equivalent qualification and a minimum of six years work experience (total) with at least four years of professional/managerial experience. Applicants will be ranked accordingly based on their entire academic record, employment experience and Statement of Purpose. Applicants will be required to attend an interview (by telephone) with a member of the selection panel.

A flexible approach for your executive career

We have designed a course which will enable you to continue to work full time. Units are delivered in intensive block mode for four days per month (usually Thursday – Sunday).

Maximise your leadership potential

During the Monash Executive MBA you will develop the capabilities required to move into executive management and leadership roles. You will build on your existing management skills and knowledge, and gain experience in applying these in a variety of settings, enabling the practical application of your learnings. You will do all this while considering how you can make business better.

You will learn to approach business in a holistic way, guided by a professional and ethical framework. Innovative thinking and entrepreneurship will be encouraged and nurtured, and management theories will be grounded in practical situations.

Leadership and personal development for executives

Leadership and personal development activities complement the academic units and are an integral part of the Executive MBA program. These activities are integrated within each unit of study, and are designed to enable you to develop your own leadership philosophy.

A series of workshops and seminars will focus on cultivating your personal leadership style, enhancing your career management and communication skills, and your understanding of the philosophical, ethical and social issues central to creating a just, prosperous and sustainable society.

A corporate project for high-performance leaders

During the final seven months of your Executive MBA studies at Monash you will participate in an experiential learning component, the corporate project.

During this project, the qualitative and analytical skills covered in the preceding units of the program will be honed into practical, real-life activities through in-company work.

A high-level cohort group

In the Monash Executive MBA you will have the opportunity to learn from the best: world-class academics and captains of industry. You will share your learning experience with the best: dedicated and experienced professionals from a range of sectors and backgrounds, challenging you to share knowledge, insights and ideas.

You will attend all your classes with the same group of like-minded and highly capable students, providing you with the opportunity to form an invaluable professional network. All Executive MBA units are exclusive to Executive MBA students and are taught in dedicated teaching and social learning spaces at our Caulfield campus in Melbourne, Australia.

The Monash MBA

The Monash MBA is one of the world's top MBA programs, specifically designed for emerging professionals with the drive and ambition to move into management and leadership roles. We offer a new approach to the development of corporate and community leaders, by developing your individual leadership and personal capabilities, and by teaching you how to manage, lead and transform organisations in a unique way.

Louise Christian
MBA Alumnus
Strategic Insights Manager, NostraData

"The Monash MBA program provided me with a significant breadth of knowledge and introduced me to a network of driven individuals who continue to challenge my thoughts and ideals. My current role is within a boutique start-up – it's exciting, diverse, and I'm often out of my comfort zone, but my MBA learnings and network provide me with the strength and support to deal with whatever comes my way."

Delivering real outcomes

During the Monash MBA you will acquire the capabilities required to become a global, transformational and socially responsible leader. You will build on your existing skills and knowledge and gain experience in applying these in a variety of settings.

You will learn to approach business in a holistic way, guided by a professional and ethical framework. Innovative thinking and entrepreneurship will be encouraged and nurtured, while management theories will be grounded in practical situations. And you will do all this while considering how to make business better.

Leadership and personal development

Leadership and personal development activities complement the academic units and are an integral part of the MBA program.

These activities are integrated within each unit of study, and systematically delivered throughout the course.

A flexible approach

The Monash MBA offers flexibility in course delivery. Units are delivered through a combination of weekend, evening and intensive modes. The program is completed over two years, allowing you to continue to work while studying.

Experiential learning project

During the final quarter of your MBA studies at Monash, you will participate in an experiential learning component. During the project, the qualitative and analytical skills covered in the preceding units of the program will be honed into practical, real-life activities.

Build a professional network

In the Monash MBA you will have the opportunity to learn from the best: world-class academics and captains of industry. You will share your learning experience with the best: dedicated professionals from a range of sectors and backgrounds, challenging you to share knowledge, insights and ideas.

You will attend all your classes with the same group of like-minded and highly capable students, providing you with the opportunity to form an invaluable professional network.

“At Monash Business School, we have a long and proud history of research excellence and achievement. We are committed to pushing the boundaries of knowledge, driving innovation, shaping business practice and making a measurable and positive impact on society.”

We work across the traditional boundaries between fields of study through our multidisciplinary research teams and centres, conducting research that transforms business, addresses global problems, and contributes in a meaningful way to the issues that matter. Our research expertise translates directly into our teaching programs, ensuring all our disciplines lead the way in business education and thinking.”

Professor Gary Magee
Deputy Dean (Research)

Research programs

A research degree at Monash lets you join the global conversation about the most prominent theories and ideas in your field, through the independent investigation of research questions that you have formulated.

Excellence in research

Monash Business School has developed a strong reputation for excellence in research across a diverse range of business interests. Our research has the scale, capability and business links that influence national agendas and shape business and professional practice.

This expertise is also translated directly into our teaching programs ensuring all our disciplines lead the way in business education. From policy analysis to financial derivatives, or health economics to industrial relations, our breadth and depth of research knowledge are of international standing. The school also provides a stimulating and supportive research training environment to its 350 plus graduate research students.

Pursuing a research degree

Monash Business School strives to provide an appropriate environment for both the personal and intellectual development of its postgraduate research students, who make such a significant contribution to the research effort of the school.

The calibre, enthusiasm and dedication of the school's 500 academic staff ensure that graduate teaching and research activities are current, relevant and rewarding. By the application of knowledge, the school adds significant value to the university's overall research reputation and strategy and contributes to the scholarly, social and commercial development of Australia and its global trading partners.

If you are considering a research degree, please contact our Research Office on (613) 9905 2483 or email buseco-research.degrees@monash.edu

Master of Philosophy

Course details	
Course code:	3194
CRICOS code:	045341G
Duration:	
2 years full time	
4 years part time	
Intake:	
March and July	
Campus:	
On campus (Berwick, Caulfield, Clayton, Peninsula)	
Off campus	
Entry requirements:	
Applicants need to have completed an upper second class bachelors degree requiring at least four years of full-time study, including a research component in the fourth year, or completed a course leading to a masters preliminary qualification at a level rated as equivalent to an upper second class honours degree, or qualifications, which in the opinion of the committee, are equivalent or a satisfactory substitute.	

A Master of Philosophy (MPhil) degree enables you to complete independent research under the supervision of expert academics, including the submission of a thesis.

While it is not necessary that an MPhil thesis would make a major contribution to the discipline by way of new knowledge (as a PhD would require), an MPhil thesis would be expected to make a contribution to an existing body of knowledge, by applying, clarifying, critiquing or interpreting that knowledge.

The principal component of the MPhil is a thesis of up to 35,000 words, embodying the results of a research project. Candidates are supported by a minimum of two supervisors throughout their candidature.

Together with their supervisors, each candidate is responsible for developing the research program to be followed and should be designed to take no more than two years of full-time equivalent candidature.

The Master of Philosophy also includes a coursework component, according to the academic discipline, for those students interested in transferring to the Doctor of Philosophy, after successful completion of confirmation, and provided that satisfactory progress has been made and certain conditions are met.

Neha Sandher
Master of Philosophy (Accounting and Finance)
Large Deal Management Operations Lead, IBM Asia Pacific

"IBM collaborated with Monash to allow their emerging leaders to pursue postgraduate studies in order to further their career aspirations. I was one of the employees selected to undertake a postgraduate course in the area of my interest. The MPhil program provided me with an avenue to pick a topic that was of interest to me and conduct research in order to see how an idea could come to life. It's given me strong skills in bringing theoretical concepts into practice and enhancing my core skills. In the future, these skills will assist me in laying foundations to approach my leadership potential and further develop my career aspirations."

Read more of Neha's story at business.monash.edu

Course details	
Course code:	0029
CRICOS code:	037832K
Duration:	
3 or 4 years full time	
8 years part time	
Intake:	
Throughout the year	
Campus:	
On campus (Berwick, Caulfield, Clayton, Peninsula)	
Off campus	
Entry requirements:	
Applicants need to have completed a bachelors degree requiring at least four years of full-time study, and which normally includes a research component in the fourth year, leading to an honours degree class I or class IIA level, or a course leading to a masters preliminary qualification at a level rated as equivalent to an honours class I or IIA degree, or a masters degree that entails work, normally including a significant research component, at least equivalent to an honours degree (a 'significant research component' in a masters degree will vary from discipline to discipline). It is normally expected that a grade of HIIA has been obtained for the research thesis or project. Where ungraded, examiners' reports will be taken into account, or qualifications which, in the opinion of the committee, are deemed equivalent.	

Doctor of Philosophy

The principal component of the Doctor of Philosophy (PhD) is a major thesis of no more than 80,000 words, embodying the results of a research project. Coursework and training will be a component of the PhD, in all of the disciplines across the school.

Our PhD program enables you to complete independent research under the supervision of expert academics. Candidates are supported by active researchers throughout their candidature. The research will culminate in a written thesis which offers a significant contribution to knowledge in your discipline.

The Monash doctoral program in business and economics is one of Australia's first PhDs with career enhancement built into the doctorate. It's a PhD that will prepare you for work beyond your degree. The Monash doctoral program includes the completion of coursework in addition to a thesis.

We offer PhD programs in:

- Accounting
- Banking and Finance
- Business Law and Taxation Law
- Econometrics and Business Statistics
- Economics
- Management
- Marketing
- Specialist streams in Economics

Tutsirai Sakutukwa
Doctor of Philosophy (Economics)

"I first encountered economics as a subject in high school and fell in love with it. I went on to do my bachelor's degree in economics, and then my MSc. I was granted a Fulbright scholarship which saw me through my MA in Economics and my PhD coursework. The Monash PhD program has honed my quantitative skills, which are imperative if you are to carry-out any research in the field of economics. In addition, it has sharpened and improved my understanding of different software packages and languages. Most importantly it has exposed me to real-life problems which I am currently addressing through my research."

Read more of Tutsirai's story at business.monash.edu

"Taking on a new role inspired me to think more about my career development.

I saw a master's as an important step in broadening my skill base and preparing me for more senior roles. Studying at Monash Business School has helped me reflect on my leadership style and vision.

Being exposed to a range of people across different industries also got me thinking about where I wanted to go next and helped me think more about where I could take my skills. It's been an invaluable experience."

Meagan Thompson

Master of Management alumnus
Project Director, Theatres Transformation,
Royal Melbourne Hospital

Information for prospective students

Higher Education Loan Program (HELP)

Loans have been introduced under the Higher Education Loan Program (HELP), which incorporate previous loan schemes including the Higher Education Contribution Scheme (HECS), the Postgraduate Education Loan Scheme (PELS) and the Bridging for Overseas Trained Professionals Loan Scheme (BOTPLS).

The HELP scheme provides an interest-free, income contingent loan facility for eligible students enrolled in: accredited undergraduate and postgraduate award programs including higher degrees by research; bridging courses for overseas trained professionals to enable them to meet the entry requirements for their profession in Australia; and courses to enable students to meet the requirements for entry into an awards program.

For further information visit:
www.goingtouni.gov.au

Fees

To study at Monash University you must pay tuition fees to the university. Tuition fees vary for different courses. Please check study.monash for more information.

Postgraduate coursework programs are full-fee places. The tuition fees quoted are for 48 credit points unless otherwise stated and are only applicable to the commencement year stated. Tuition fees for course commencement in coming years will be different. Monash University reserves the right to adjust annual tuition fees for future years of your course. However, Monash University undertakes that any adjustment factor for those continuing students will not exceed six per cent per annum. Any adjustment will be applied on the first day of January each year for teaching periods within the census date thereafter.

Credit (advanced standing) for previous study

Applications for credits/exemptions must clearly indicate units for which advanced standing is requested and must be accompanied by a legally certified copy of your academic transcript and unit syllabus, usually from the course handbook. Each application is assessed on a case-by-case basis.

It is essential that units submitted for credit/exemption fit the philosophy and principles of this course of study. Units studied more than 10 years ago will not be considered for credit/exemption.

Student development

Monash Business School offers a range of student development activities to enhance your academic studies, develop your skills and transform your career path. These include:

- Orientation for postgraduate students
- Academic Development and Enhancement Program for Tertiary Studies (ADEPT) workshops
- Personal and professional development programs
- Postgraduate PAL (Peers, Ambassadors and Leaders) program
- Mentoring programs
- Career readiness programs

For more information on our extracurricular programs and to get involved, visit:
business.monash.edu

Off-campus programs

Off-campus learning is a flexible mode of study based on independent learning materials and learning support systems that allow students to study with little or minimum attendance at a university campus. Some of our postgraduate courses are offered in off-campus mode to help you balance your study goals with other commitments.

To find out more about our off-campus courses and application procedures please email: enquiries.caufield@monash.edu

Postgraduate scholarships and awards

Monash University offers a wide range of postgraduate scholarships to help you pursue postgraduate study. Scholarships are available for coursework and research degrees.

For more information visit:
monash.edu/study/scholarships

International student visas

International students should visit: www.monash.edu.au/international which contains important information regarding how to apply as an international student, Australian Government requirements and conditions for study in Australia, living costs, course fees, health insurance, working while you study, work rights for your husband or wife and schooling for your children.

Further information about visa applications can be obtained from:
www.liveinaustralia.com/student-visa and www.immi.gov.au/students

For further information about English language requirements at Monash University visit:

adm.monash.edu.au/admissions/postgrad/pg-english-requirements.html

Further information for all other international students is available at:

monash.edu/study/international/apply/entry-requirements/#english/

English language proficiency

You should meet one of the following criteria:

— You have achieved a satisfactory level of performance in an English subject at Year 12 or equivalent level. This means a study score of at least 25 in units 3 and 4 in any VCE English subject.

— You have studied in an institution where English is the language of instruction and assessment for the entire institution (subject to the details in the University's admission policy).

— You have undertaken an English language proficiency test within two years prior to your study commencement date and have achieved the following results:

— IELTS – minimum test score of 6.5 with no individual band score less than 6.

— TOEFL – minimum test score of 550 with a Test of Written English score of at least 4.5, Internet based TOEFL overall 79, Writing 21, Listening 12, Reading 13, and Speaking 18.

— Cambridge English Certificate in Advanced English (CAE), minimum test score required: A grade of 'A'

— Cambridge Certificate of Proficiency in English, minimum test score required: A grade of 'C'

— You have successfully completed the Monash University English Language Bridging Program, or equivalent programs, at the appropriate level.
