

## Double Degree Courses

A Monash Double Degree course gives you the benefit of studying towards two degrees at the same time, enabling you to keep your options open, develop expertise in different but complimentary areas or simply to pursue two areas of interest in depth.

A Monash Double Degree course takes two years less to complete than if you study towards the two degrees separately. This is made possible by required units in one course counting as electives in the other.

You could choose to study towards two bachelor degrees at the same time or alternatively you could take a double degree course to train specifically for a profession that requires depth of expertise in two distinct areas.

You will be presented with two testamurs one for each bachelor degree completed.

Over 140 double degree combinations will be available from 2016.
